

**April 5, 2019**

**APR - 8 2019**

Dear Neighbour,

Safety is a core value at Canadian Natural Resources Limited (Canadian Natural). We continuously work with our employees, contractors, service providers and the communities where we operate to find new ways to improve our safety performance. We are privileged to operate in your community and on your property, and the safety of residents near our operations is our utmost priority.

Canadian Natural has experienced numerous wellhead strikes annually over recent years. We are committed to working together to reduce these incidents.

In order to eliminate wellhead strikes by farming machinery it is very important that we all pay attention to where we are going. An ignition source is possible if contact is made with any part of the wellhead. **Failure to do so can result in serious personal injury or a fatality.** Please do not place yourself at risk!

The following steps can assist you:

1. **Reduce your speed** and ensure that you maintain a safe distance from the wellhead and associated piping.
2. **Stay alert** and be extra careful when operating equipment in poor visibility conditions near dusk or at night.
3. **Share and communicate** with farm equipment operators to ensure that they are familiar with equipment and wellhead locations.
4. **Be Safe**, tech innovations (GPS) are extremely helpful but they may not be accurate enough to rely on for safety.
5. **If you have any Safety concerns** please notify your local Canadian Natural Operations staff.

It is important to plan ahead and keep these steps in mind so that you can avoid possible lost time, additional costs, and potential safety risks associated with wellhead strikes.

If you have an emergency with wells or pipelines on your land please contact our emergency number at 1-888-878-3700.

Thank you,

Canadian Natural
